# Daryl Chua

## Aspiring Software Developer

I am a highly motivated individual adept at time management and leadership. My strengths in adaptability and meticulousness allow me to thrive in team-oriented environments, where collaboration and diverse perspectives drive success. I also enjoy embracing novel experiences and continually seek opportunities for personal and professional growth.

## EXPERIENCE

**NTT Ltd.**                                              May 2023 - Aug 2023

### SOFTWARE ENGINEER INTERN

- Contributed as a key member of a dedicated developer team spearheading a $10 million project, overseeing the end-to-end implementation of a web-based safety platform (web-based with data analytics) for a prominent national incident reporting and management client
- Played a pivotal role in achieving project milestones and revenue objectives by successfully executing migration of sensitive data for the client using a combination of migration tools and SQL

**City Surfer Pte. Ltd.**                                Jun 2021 - Dec 2021

### FREELANCE VBA DEVELOPER

- Increased productivity by 50% by creating an Excel Order Tracking System.
- Created a 1-click functionality to update and save documents, and send email.

**DBS Pte. Ltd.**                                         Sep 2018 - Jan 2019

### BUSINESS ANALYST / VBA DEVELOPER (INTERNSHIP)

- Demonstrated expertise in Microsoft Office suite, including Word, Excel, and PowerPoint, to produce professional reports and presentations.
- Generated and presented the Annual Performance Review based on stipulated KPIs.
- Developed an internal software-based survey form to collate responses for end of year peer review.
- Sat in for SCRUM and AGILE meetings facilitating a new project.

## PROJECTS

### TICKET BOOKING SYSTEM                                  2024

- OOP-based eCommerce school project built with React, Spring boot, and MongoDB.

### AUTHENTICATION PROJECT                                 2023

- A serverless IaC prototype with AWS (Cognito, Lambda, S3, RDS), JWT, and TypeScript for a user authentication school project for a sponsor.

### SEIKO MODS ARTISAN                                     2022

- A landing page built with Next.JS, Mantine UI, Tailwind, to showcase a portfolio of custom made watches and Telegram API to forward enquiries.

### RECEIPT CALCULATOR                                     2022

- Created a receipt-splitting calculator to solve "who pays who how much?" with Bootstrap, JavaScript, and Optical Character Recognition.

### PORTFOLIO WEBSITE                                      2022

- My personal portfolio hosted on Vercel done with React, Material UI, and Framer Motion to showcase my experience, skillsets, and more about myself.
